

NATIONAL SECURITY

Experts in Intelligence Data and Image Collection Management and Analytical Support

Platinum Solutions, Inc. is a multidisciplinary research, analysis, and software development firm specializing in solving complex information processing problems – particularly those encountered by decision makers, crisis managers, and analysts engaged in intelligence, law enforcement, and special operations activities.

Platinum Solutions' national security support team members are recognized leaders in software development and systems integration for national intelligence agencies. Our automated intelligence analysis techniques and threat assessment tools are currently in use throughout the U.S. intelligence community and federal law enforcement. Our user-friendly systems serve as the search engines for intelligence and law enforcement analytical products critical to mission objectives.

Our systems and utilities are frequently used in conducting routine and emergency threat assessments and performing real-time, crisis driven intelligence analysis. Our software is widely credited by leading federal law enforcement officials for its mission-critical support of digital image analysis, language processing of the less commonly taught foreign languages, and critical incident reporting. Recent success stories include:

Law Enforcement & Intelligence Linguist Access System (LEILA) - Platinum Solutions developed the Law Enforcement & Intelligence Agency Linguist Access System (LEILA) under the direction of the National Virtual Translation Center (NVTC). The NVTC was established by the Patriot Act for the purpose of providing timely and accurate translations of foreign intelligence for all elements of the intelligence community. LEILA is a Web interface for a comprehensive database of language specialists spanning across multiple agencies and organizations. The database includes detailed information regarding language skills and experience.

Hostage and Barricade System (HOBAS)

Platinum Solutions completed the Hostage and Barricade System (HOBAS) for the Federal Bureau of Investigation (FBI) in conjunction with partner Science Applications International Corporation (SAIC). The HOBAS online application provides the FBI's Crisis Negotiation Unit (CNU) with a centralized repository for hostage and barricade incident data and resolution outcomes. HOBAS provides data collection functionality, search capabilities, and statistical analytics. The HOBAS Web application is made available to law enforcement agencies throughout the country via the Law Enforcement Online (LEO) secure network, another Platinum Solutions success story.

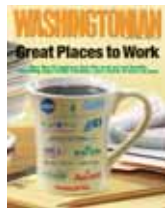

“
We developed a relationship with Platinum Solutions on which we continue to rely. 100% accuracy is the norm.

”

– Unit Chief
Federal Bureau of
Investigation (FBI)

Core Competencies

- Digital Signal Processing
- Digital Image Analysis
- Algorithm Design and Development
- Computer Forensics
- Secure Interagency Collaboration
- Foreign Language Processing and Analysis - less commonly taught languages are a specialty
- Code and Cipher Breaking and Cryptanalysis
- Natural Language Processing - information extraction, entity identification
- Electronic Data Collection, Analysis, and Presentation
- Case Management, Incident Management, and Performance-Based Workflow
- Operational and Mission Support Systems
- Service Oriented Architecture (SOA) - thought leader and pioneer in SOA-based software development

Operations Support

We are a recognized leader in law enforcement and intelligence analysis. Through the application of advanced information technologies and innovative methodologies, Platinum Solutions' experts assist analysts and decision makers in solving complex investigative problems, providing knowledge management solutions, and creating collaborative environments, particularly those associated with handling vast amounts of raw data.

Among a Select Few When It Comes to Quality Assurance

We clearly understand the importance of quality to those to whom we provide intelligence, law enforcement, and public safety support. Among the more than 800 8(a) certified software development firms, Platinum Solutions is in the one percent of 8(a) certified firms that have been appraised at Capability Maturity Model Integration (CMMI) Maturity Level 2 by a Software Engineering Institute (SEI) authorized appraisal team.

Our Quality Management Program is devoted to continually expanding and enhancing the Platinum Solutions Delivery Methodology (PSDM); guiding projects in the use of standard processes, tools, and templates; training and coaching project managers on CMMI-compliant practices; and conducting independent audits of our projects to ensure compliance with standards and to identify improvement opportunities. Our emphasis on requirements gathering and management significantly reduces defects and rework and increases client satisfaction. Our PSDM quality discipline ensures our projects produce high quality, timely, and predictable outcomes and deliverables.

Advanced Technology Support

Solving complex business and technical challenges is a core competency. Our experts have deep experience addressing IT challenges and implementing IT solutions in the development, production, and deployment of advanced technology. Our process includes tapping world-class performers in mathematics, engineering, IT, communications, intelligence training, and other key areas.

Analytical Services

Our analytical professionals, creative thinkers, and problem solvers help you assess current threats and emerging challenges. Our diverse team of cleared experts is comprised of individuals from many countries, offering both cultural awareness and superior academic credentials.

About Platinum Solutions

Headquartered in Reston, Virginia, Platinum Solutions is a privately owned and operated Woman-Owned Small Business (WOSB) serving the Washington, D.C., Norfolk/Virginia Beach, and Atlanta, Georgia metro areas. We are certified by the SBA as an 8(a) Small Disadvantaged Business (SDB). We offer a comprehensive GSA IT services schedule for federal, state, and local government agencies. For an electronic copy of our GSA Schedule Catalog & Price List, please e-mail your request to nationalsecurity@platinumsolutions.com.

A Breed Apart

Our very selective hiring processes identify only the best and brightest people. We test our candidates for technical excellence and also for creativity and efficiency. On average, our teams have more technical experience and subject matter expertise than most other providers – more than 93 percent of our personnel hold advanced degrees and have more than 10 years of specific technical experience. Not only do you have access to technical prowess, but it comes with a refreshing "can-do" attitude. You'll find our people rally to solve challenges by applying the latest proven software and management techniques to make your program succeed.

Our formula for success is simple. Platinum Solutions recruits and attracts the people who are not only great at what they do, but are passionate about solving very complex problems efficiently and effectively. Our team is dedicated to your mission for best-practice results. We apply proven iterative process methodologies that use frequent collaboration for the most efficient solution and, as a bonus, maximize your earned value.
